

# TOCHI

## Digital Ultrasonic Generator

### ERUJ-03

Continuous Welding Mode

20 kHz  
Frequency

2000 W  
Power Supply

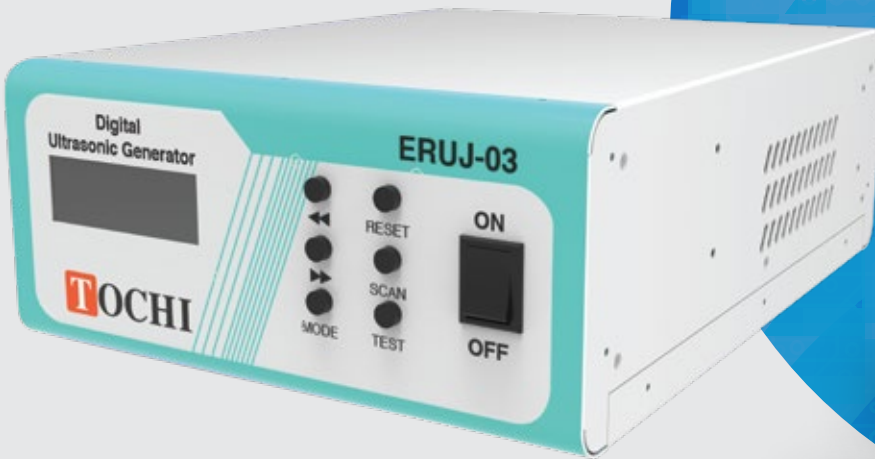

Fast, Low Cost and Ultrasonic Technology  
for Flexible Welding Processes

# ERUJ-03

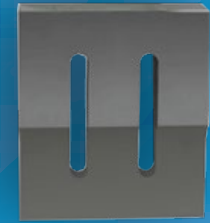

## Digital Ultrasonic Generator

High frequency 20 kHz used in mask production Available with 2000 W Power Output and 2 years warranty.

- Ability to High Production
- Continuous Welding Process
- Non-Contact Welding and Weaving
- Automated Easy Integration
- Soft and Elastic Surfaces
- Skin-Friendly Products

Digital Ultrasonic Generator

Horn Converter

Welding Horn

### TECHNICAL SPECIFICATIONS

Digital Generator	: Continuous welding mode. - Continuous welding mode used for manual or semi-automatic mask machine. - Continuous welding mode used for automatic mask machine. - Continuous welding mode for full automatic.
Converter	: Korean Technology LBT piezoelectric welding tip.
Horn Mold Size	: 110x20 mm or 200x20 mm welding tip.
Frequency	: 20 kHz
Ultrasonic Power	: 2000 W
Energy Input	: AC 220V, 50 Hz
Advantages	: - Easy to use and install - Frequency setting - Frequency auto tracking feature - Different welding tip options - Long working time
Gross Weight	: 14 Kg (Kaynak ucu dahildir.)
Package Length	: 500 x 370 x 350 mm
Package Included	: Full set (Kaynak Ucu, Ultrasonik Jeneratör, AC Kablo, Tetikleme Kablosu)
